

Please resist any lobbying efforts to limits programming and information provided by satellite radio. This new and innovative technology, though threatening to existing media giants provides a useful and necessary alternative to other choices. This essential freedom of choice is a fundamental precept upon which this country was founded. Unfortunately, the NAB has a somewhat shameful history of opposing such innovation and choice. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's, as well as other entities, ability to provide the full range of programming.

Thank you.
